SRINIVASA RAMANUJAN: A GLIMPSE OF HIS LIFE AND MATHEMATICS

In his short lifespan, Indian Mathematical genius Srinivasa Ramanujan (1887-1920) made some remarkable discoveries. Several of his discoveries opened up new dimensions of study. In this expository talk, we will give a brief sketch of his life and a glimpse of his mathematics. In particular, we will discuss his contributions to the theory of partitions, modular equations, continued fractions, and series for 1/pi.

Department of Mathematical Sciences, Tezpur University

WHEN

October 27, 2017 (Friday) 4 PM

WHERE

Seminar Hall, ISI NE Centre, (inside Tezpur University campus)

ALL ARE CORDIALLY INVITED

Indian Statistical Institute North-East Centre Tezpur, Assam

ISI NE COLLOQUY

ISI NE Colloquy hopes to engage minds in academic discourses pertaining to a gamut of theoretical and applied disciplines.

It envisions to host brainstorming sessions with stimulation from experts and scholars.
